EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Kevin T. Bastuba on October 24, 2008.

The application has been amended as follows:

As to **claims 31, 32, and 33**, please insert *"responding to each of said emissions having different polarizations;"* between the claim limitation, *"at the optically addressable display:"* and the claim limitation, *"at each pixel,"*

As to **claim 35**, please insert *"responding to each of said emissions having different polarizations;"* between the claim limitation, *"at the optically addressed display:"* and the claim limitation, *"filtering to make each set of commonly colored display elements".*

2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, none of the prior arts of record teaches an optically addressable display comprising a projection device including a mechanism to create emission having plural polarizations, wherein the number of polarizations defines a corresponding number of color channels and a screen including a plurality of receptors including at least one receptor responsive to a corresponding polarization state for each of the color channels and activating pixels depending upon which, if any, of the emissions having a corresponding polarization state for the corresponding color channel is received.

Regarding claim 25, none of the prior arts of record teaches a method of encoding color data to activate an optically addressable display comprising the steps of: producing emissions having different polarizations at a projection device, and responding to each of the emissions having different polarizations with a corresponding receptor and producing a different display for each of the emissions having different polarizations when responded to by the corresponding receptor, at each pixel of the optically addressable display.

Regarding claims 31, 32, and 33, none of the prior arts of record teaches a method of encoding color data to active an optically addressable display comprising the steps of: producing emissions having different polarizations at a projection device, and responding to each of the emissions having different polarizations and producing a different display for each of the emissions having different polarizations at each pixel of the optically addressable display.

Regarding claim 35, none of the prior art of record teaches a method of encoding color data to active an optically addressable display, comprising the steps of: defining multiple color channels with emissions having different polarizations at a projection device, and responding to each of the emissions having different polarizations and filtering to make each set of commonly colored display elements responsive to a different polarization state than other sets of commonly colored display elements.

Regarding claim 36, none of the prior arts of record teaches an optically addressable display comprising a projection device including means for directing emissions having plural polarization states toward an array of pixels and a screen including receptor means responsive to each of the plural polarization states and means for actively producing plural color displays, on for each of the plural polarization states.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SEOKYUN MOON whose telephone number is (571)272-5552. The examiner can normally be reached on Mon - Fri (8:30 a.m. - 5:00 p.m.).
